

Using Video in Your Proposals Like a Pro

How many of you like making money?

How many of you enjoy having fun?

Who here is already making sales proposal videos?

Now those of you who didn't raise your hand hopefully by the end of my 15 minutes you will see the benefits, possibilities, and then take action for yourself.

Your goal is to stand out and be that hidden gem people are wanting to spend good money on!

Other companies will just pass you by if you don't stand out and other businesses are already adapting to video proposals which really means your prospects are already used to it and if they're not they will be pleasantly surprised by how you stand out and how professional you are.

Now is this really worth it?

Well last year as a single owner operator I only did 316 jobs last year of an average ticket of a \$919 per job of those 316 jobs 24% of them sold over a \$1000 of those jobs that's all over a 1000, 52% of those jobs were sold because a video estimates.

In 2018 my company increased 92% in gross revenue and a 138% increase on Net income

2018 because we added video proposals and various other tactics and strategies our average ticket increased 34% !

I have a brief video that is pre-filmed. <http://bit.ly/HighTicketSalesVideoTraining>

Regardless of your an Apple or an Android video proposal maker you're going to find huge nuggets to stand out from the crowd and not get left behind.
